Edited by the Institute for New Testament Textual Research, Münster/Germany 5th, Revised Edition (UBS5); Standard edition Hardcover red.

Following intensive preparatory work, the Fifth Edition of the UBS Greek New Testament ("UBS 5") has now been published. The most widely used edition of the Greek New Testament worldwide is thus now available in a fundamentally revised, improved edition.

The readings of the newly discovered Papyri 117 - 127 have been incorporated into this edition, thereby opening up interesting perspectives particularly for the Acts of Apostles. Besides, it is now displayed in the apparatus, where selected modern Bible translations (English, German, French, Spanish) are based on a variant reading rather than the principle version of the text.

A special focus of the revision was on the Catholic Epistles, in which the edition has been made consistent with the Second Edition of the "Editio Critica Maior" and the 28th Edition of the Nestle-Aland Novum Testamentum Graece. This led to more than thirty modifications in the reading text and resulted in a new selection of witnesses for the textual apparatus, in addition to modifications of the selection of apparatus units.

## Description

Finally, the Discourse Segmentation Apparatus has undergone thorough revision.

The edition was typeset with a new, aesthetically appealing and readily legible Greek font (see "More Information" below the product description).
